

Business SoftPhone

Make and Receive Calls from Anywhere in the World

Turn Any Device into Part of Your Phone System

SoftPhones are software that utilise VoIP technology, enabling devices such as smartphones, laptops, and PCs to make and receive telephone calls. It turns any device into an extension of your office phone system without the need for an IP Phone. All that's needed to run the program is a stable internet connection.

Enterprise Grade Features and Functions

Our softphone app provides you with a full suite of PBX features and functions. Use features like call transfer, call park and music on hold from your phone or laptop.

Ideal for Remote and Mobile Workers

SoftPhones are the ideal solution for businesses that are constantly moving. Whether you provide hybrid working or your staff are regularly off business premises you can stay connected.

No Lock-In Contracts

Our plans are free of fixed terms so you can easily scale your system by adding extensions as your business grows.
